Sample Location: Restroom Sink

Location Type:

Location Code: YID

Disinfectant Used:

Free Chlorine:

Total Chlorine:

Comments: Second release. Inadvertently sent back for approval. No data or demographic changes. Original release 4/18/19.

PWS - Colilert Profile

Method: SM 9223B

Analyte	Test Result	Unit	Conclusion	Date Tested
Total Coliform	Absent			04/16/2019
E. coli	Absent			04/16/2019

Report Date: 05/08/2019

Reported By: **Cindy Price**

Explanations of Coliform Analysis:

If coliform bacteria are **Absent**, the water is considered safe for drinking purpose. If coliform bacteria are **Present**, the water is considered unsafe for drinking purpose. Presence of *E. coli* (bacteria) generally indicates that the water has been contaminated with fecal material. It must be remembered that a water analysis refers only to the sample received and should not be regarded as a complete report on the water supply.
